Profile

Highly skilled software engineer with 5 plus years of experience in backend development, with proven expertise in developing low-latency applications with remarkable user experiences and integrating 3rd party Apis to build robust backend servers.

Experience

Lead Backend Engineer, GOMEDICZ
2023

- Led a team of engineers to build a system that made health care more accessible to people.
- Implemented the doctors, riders, and hospital applications and the user onboarding, alongside integrating third party APIs.

Software Engineer, Travella.io
2022-2023

- Contributed to the development of the logistics infrastructure, resulting in a steady increase in the daily delivery of goods peer to peer by 65% over the course of 8 months.
-- Implemented a virtual wallet system, increasing user engagement by enabling the funding of in-app wallets, and improving user experience by enabling seamless payments and achieving growth in overall app usage.
-Collaborated with frontend engineers, designers and product managers to ensure seamless delivery of the team's products resulting in a 70% increase in on-time product delivery.

Backend Engineer, Settle
2021-2022

-Collaborated with a team to solve the problem of house hunting around campus making the process much less stress-free. This resulted in students settling much faster and also finding potential roomates easily via the platform.

Backend Engineer Intern, HNG
2021

Contributed to the development of a slack clone by:
-Writing the global error handler
- Collaborated with hundreds of developers across the continent, enhancing skills in working under pressure and in teams, resulting in overall growth and development.

Full Stack Engineer Intern, FIDOO
2020

Wrote scalable softwares targetted at helping SME's.
-Tasked with implementing designs using NextJs
-Automated workflows that helped with smooth operations providing ease of business

Education

BSC. Computer Science, Nasarawa State University.
2018-2022
